Re: Foreman's Report

Equipment:

New Town tractor is arriving next week. We are currently using a loaner which is an excellent grass cutting machine.

Road Repair:

We are getting quotes for road repair for White City Drive and Lott Road.

Water Treatment Plant:

Repairs of water distribution pipe are to start on July 18th for approximately four days. Citizens will be notified as water will be shut down from 11pm to 4am for a minimum of one night.

Optimist Park:

Ball diamonds are being watered every day using backwash water from the Water Treatment Plant at 4500 gallons per day. This has a positive impact on lagoon capacity.

Lift Stations:

All lift stations are fully operational. An engineer is required to give advice for number one lift station as the holding tank is too small.

Other:

We continue to pump water from Ramm Avenue East to the retention pond.

We are finally receiving nice weather after all of the rain and are starting to catch up with grass cutting and other park maintenance.

Respectfully submitted,

Darryle Bulych
