Dear Mr. Perras:

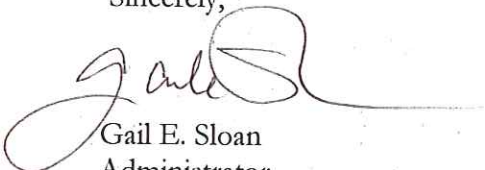

Re: White City Lagoons

The RM would like to bring our concerns regarding the management of the White City Lagoons to your attention. We have received complaints that the irrigation pivots are not being managed properly. The lands that are being irrigated are oversaturated and the effluent is running off into adjacent sloughs. It is our understating that as a condition of the Permit to Operate the irrigation is to occur on a legume crop, however, we believe the lands have not been seeded.

Adjacent landowners have raised concerns that the effluent has not met the minimum 210 day storage and we would request that this be investigated by your office.

Please contact me if you require any additional information or have any questions and we will await your response.

Sincerely,

Gail E. Sloan
Administrator
