Re: Foreman's Report

**Equipment:**

We received a new town tractor from Nick's Service. The machine is excellent in performing the duties as required.

**Road Repair:**

I am having difficulty getting companies to give quotes for pavement repair on White City Drive and Lott Road.

**Water Treatment Plant/Lagoon:**

Repairs of water distribution pipe will be completed July 22<sup>nd</sup>. Citizens will be notified as water will be shut down from 10pm to 5am for a minimum of one night. I will be on site for start-up.

The wet well at the lagoon is currently at 55 inches. This means that we are over halfway down to the proper level. The pivot will be sprayed the fourth week of July for noxious weeds by Mark Kelsh.

**Optimist Park:**

Ball diamonds are looking good. There are some issues with sprinklers that I will address.

**Other:**

Walking trail lights are to be added to Confederation and Federal Parks. Approximately seven lights will be installed on existing power source. Iles Electric is the contractor.

Interviews were conducted for an additional maintenance employee. The new employee will start the first week in August.

Current projects include crack sealing streets with tar, grass cutting, tree pruning, ball field maintenance, installation of new signs and removal of weathered signs.

Respectfully submitted,

Darryle Bulych
